

handcrafted software

Handcrafted Software is a fast growing mobile software company. Established in 2009 by a group of expert developers working on the mobile market since its first steps, the company was founded to specifically target the iOS and Android market.

Today, our developers team is made of young talented and passionate individuals that can deliver professional quality products.

Handcrafted Software has demonstrated ability to work on a variety of projects, spanning from in-house designed products to custom applications for a pool of selected clients. Facing the technological challenges and opportunities posed by the mobile segment, few other companies can claim the same experience and competence in this constantly evolving field.

DraWords is the funniest board game ever created on iPad! Enjoy it on an evening with your mates, while travelling or as a way to make new new friends. It has been translated in 6 languages and has been featured on AppStore for over a month

"Finally came out a game that never tires us and above all it will give us a lot of fun moments to share with our friends.

We are talking about Drawords."

--iPadItalia review

Drawords

iMetano and **aMetano** iMetano and aMetano are the first mobile apps to provide information about natural gas filling stations in Italy on a map.

With a simple tap, iMetano users can:

- calculate the fastest route to a specific gas station
- read a list of gas station details such as telephone number and opening hours

iMetano was included in the notable worldwide applications on AppStore due to its novelty

“Il meglio di AppStore: iMetano”

20 november 2009

Metano

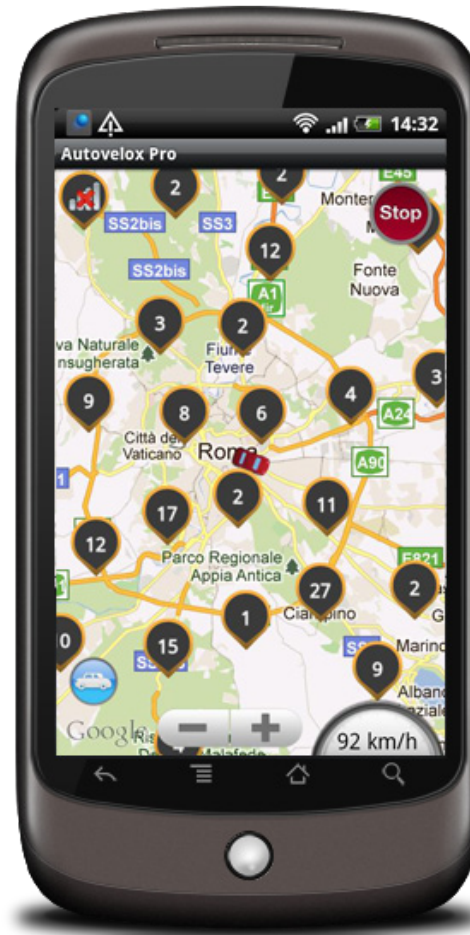

Avoid unnecessary fines with **Autovelox Pro**.

Autovelox Pro is the new speed detection system available for Android. Designed to have a usability 'of the highest level and a very attractive look and feel.

The Application has an highly detailed proprietary database that makes it able to report all fixed and mobile speed cameras on the Italian territory. Moreover Autovelox Pro avoids annoying false alarms because it can see if the speed camera is directed in the direction of the driver or not.

Autovelox Pro also has a sophisticated system to identify the routes tutors.

For each route tutor, in fact, the app reports not only the control points but also the distance to the next control point and the average speed that the user holds within it.

Limite: 50 km/h	Distanza: 119 m
Velocità: 7 km/h
